

# VMware SASE Network Optimization Service

## Enabling WAN transformation

### At a glance

SASE Network Optimization service provides direct access to a SASE Specialist to get you the most from your SASE investment.

Backed by the data from thousands of data sources across VMware deployments within the same vertical and armed with proven best practices, this Specialist will get you success with SASE and optimize business resources for your IT transformation.

### Key benefits

- Leverage real-time data analytics to drive business decisions and network improvements
- Receive advanced and customized technical and strategic networking guidance
- Get a knowledgeable, experienced resource who works alongside your team to implement effective network technology solutions

### Pricing and scoping

The VMware SASE Network Optimization includes the following services:

- Bi-Annual Network Performance Analysis & Recommendations
- Bi-Annual Return on Investment Analysis
- Bi-Annual Customer Health Check
- Bi-Annual Security Assessment
- As needed (max 4): Upgrade Benefit Analysis

For pricing, please contact your local VMware sales representative.

VMware SASE™ currently manages over 10k customers and 350k+ devices worldwide. The VMware SASE Network Optimization service enables customers to leverage VMware SASE expertise with deep analysis of the network and comparing it with the broader customer base in the same industry. This insight from a wide range of data sources is followed by clear recommendations on how to optimize your deployment.

### Taking it to the next level

VMware SASE Network Optimization Service provides a comprehensive approach to network optimization. It is comprised of four services delivered bi-annually and one service delivered on demand.

Bi-annual VMware SASE Network Performance Analyses and Recommendations Report covers:

- Executive briefing
- Overlay branch and hub performance
- Per-VMware SASE Edge network performance with recommendations applicable to specific region
- Sorted Edge performance by capacity and QoE (Quality of Experience)
- Overall comparison with industry and similar deployments

Bi-annual VMware SASE Health Check Report reviews include:

- High-level design and low-level design
- Orchestrator configuration
- VMware notifications on software updates and best practices
- Best practice recommendation
- Edge health assessment

Bi-annual VMware SASE Security Assessment includes the security disposition of the following SASE components:

- VMware SASE Orchestrator
- VMware SASE Gateways
- VMware SASE Edges

## Terms and conditions

This datasheet is for informational purposes only. VMWARE MAKES NO WARRANTIES, EXPRESS OR IMPLIED, IN THIS DATASHEET. All VMware service engagements are governed by the VMware Professional Services General Terms and Conditions. [www.vmware.com/files/pdf/services/tc.pdf](http://www.vmware.com/files/pdf/services/tc.pdf)

- VMware Cloud Web Security Assessments of the security policies implemented in accordance with best practices and security governance of the enterprise. This would include:
  - SSL inspection
  - URL filtering
  - Content filtering
  - Content inspection

Bi-annual VMware SASE Return on Investment Report includes:

- Overall and per-Edge savings from partial outages/outages
- Overall and per-Edge savings from operational enhancements
- ROI (Return on Investment) estimation based on previous system

A VMware SASE Upgrade Benefit Analysis Report is available on demand and can be delivered up to four times a year. This report covers upgrade benefit analysis based on your needs and objectives.

As with all VMware Professional Services, we focus on transferring knowledge so you can operate and improve your VMware environment, reduce costs, and accelerate business breakthroughs on your own.

## Customer profile

You should consider the VMware Network Optimization Service if:

- You have recently made a substantial investment into the SASE platform, or plan to do so and are eager to quickly get the maximum possible return.
- Operate a network environment where applications and uptime are critical.
- You want in-house expertise to educate and support your networking team and to help identify opportunities to optimize your SASE investment.
