

# VMware SASE WAN Performance Analysis Service

## At a glance

Backed by the data from thousands of sources across VMware deployments within the same vertical and data from the configured solution, this WAN Performance Analysis Service will provide guidance on capacity planning, link selection and how to optimize your WAN links.

## Key benefits

- Comparison of network performance across similar industry vertical and locations
- Leverage real-time data analytics to drive business decisions and network improvements

## Pricing and scoping

VMware SASE WAN Performance Analysis Service delivers a detailed report that will be presented via a conference call. For pricing, please reach out to your local VMware representative.

## For more information

For more information about this service, please reach out to your local VMware representative.

## About VMware Professional Services

VMware Professional Services transform IT possibilities into business outcomes. Our comprehensive portfolio of services uncovers and exploits the unique opportunities made possible by VMware technology. Drawing on our unparalleled product expertise and customer experience, we collaborate with your team to address the technical, people, process, and financial considerations for IT transformation to deliver results that are positive, tangible, and material to IT and your business. [www.vmware.com/services](http://www.vmware.com/services)

VMware SASE™ currently manages over 10k customers and over 350k devices worldwide. The VMware SASE WAN Performance Analysis Service enables customers to leverage VMware SASE expertise with deep analysis of the network and comparing it with the broader customer base in the same industry. This insight from a wide range of data sources is followed by clear recommendations on how to optimize your deployment.

## Take control of your savings

The productivity of an organization requires that all employees have a high-quality user experience when accessing business applications. VMware SASE WAN Performance Analysis Service puts you in control of your deployment to uncover throughput bottlenecks, Quality of Experience issues, and identifies areas for improvement.

VMware SASE WAN Performance Analysis Report includes the following:

- Executive briefing
- Overlay branch and hub WAN performance
- Per-VMware SASE Edge WAN performance with recommendations applicable to a specific region
- Sorted Edge performance by capacity and QoE (Quality of Experience)
- Overall comparison with industry and similar deployments
- Local Link selection recommendations

As with all VMware Professional Services, we focus on transferring knowledge so you can operate and improve your VMware environment, reduce costs, and accelerate business breakthroughs on your own.

## Customer profile

You should consider the VMware SASE WAN Performance Analysis Service if:

- You have recently made a substantial investment into the SASE platform or plan to do so and are eager to get the maximum possible return quickly.
- Operate a network environment where applications and uptime are critical.
- You want in-house expertise to educate and support your networking team and to help identify opportunities to optimize your SASE investment.

## Terms and conditions

This datasheet is for informational purposes only. VMWARE MAKES NO WARRANTIES, EXPRESS OR IMPLIED, IN THIS DATASHEET. All VMware service engagements are governed by the VMware Professional Services General Terms and Conditions. If you are located in the United States, the VMware contracting entity for the service will be VMware, Inc. If you are outside the United States, the VMware contracting entity will be VMware International Limited.
